

Course Unit	Water Supply and Wastewater Systems	Field of study	Engineering and Related Techniques
Master in	Environmental Technology	School	School of Agriculture
Academic Year	2023/2024	Year of study	1
Type	Semestral	Semester	2
Workload (hours)	162	Contact hours	T - TP - PL - TC - S - E - OT - O -
		Level	2-1
		ECTS credits	6.0
		Code	1076-809-1105-00-23

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Tomás de Aquino Freitas Rosa Figueiredo

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. Know and identify the components of the supply water and wastewater systems
2. Understand the procedures for design and analysis of water supply and wastewater systems
3. Use available computer programs for design and analysis of water supply and wastewater systems

Prerequisites

Not applicable

Course contents

Water supply systems: components and elements for design and analysis; water collection; water transport and storage; distribution networks. Wastewater systems: components and elements for design and analysis; stormwater and sewer systems design.

Course contents (extended version)

1. Supply water systems
 - Introduction and system components
 - Water demand and flow rates
 - Water collection: surface and subsurface intake systems
 - Water transmission: systems design and components
 - Water storage: Types of tanks; functional and construction aspects
 - Water distribution networks: general aspects, design and construction
2. Wastewater systems
 - Types and system components
 - Planning and systems design
 - Stormwater system components and design
 - Sewer system components and design
 - Management, operation and maintenance of wastewater systems

Teaching and learning methods

Lectures: oral presentation. Lab sessions: resolution of exercises and written reports for the different exercises. Use of computer programs for design and analysis.

Assessment methods

1. Alternative 1 - (Regular, Student Worker) (Final, Supplementary)
 - Practical Work - 50% (Minimum mark: 9, 5 (0-20))
 - Intermediate Written Test - 50% (Minimum mark: 9, 5 (0-20))
2. Alternative 2 - (Regular, Student Worker) (Final, Supplementary, Special)
 - Final Written Exam - 100% (The final exam includes the practical component)

Language of instruction

Portuguese
