

Course Unit	Nursing the Person in Critical Condition and/or Organ Failure II	Field of study	Nursing
Master in	Medical-Surgical Nursing caring for the person in critical stage	School	School of Health
Academic Year	2023/2024	Year of study	1
Type	Semestral	Semester	2
Workload (hours)	297	Contact hours	T - - TP 60 PL 30 TC - - S - - E - - OT - - O - -
		Level	2-1
		Code	5064-762-1201-00-23
		ECTS credits	11.0

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Ana Sofia Figueiredo Costa, Marco Bruno Mendes de Sousa

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. identify the main changes associated with complex processes of critical illness and/or organic failure of several systems
2. Understand the specificities inherent to the good practice of Gerontological/Geriatric nursing care.

Prerequisites

Not applicable

Course contents

critical illness and/or organ failure related to changes in: Airway and Respiratory; Cardiovascular; Neurological; Musculoskeletal; Gastrointestinal, Genitourinary and nephrological; Endocrine and metabolic; Immunological and hematological. 2. Applied anatomy and physiology; applied biophysics and biochemistry; applied microbiology and epidemiology; applied pharmacology and nutrition of the high-risk patient. 3. Gerontogeriatric considerations

Course contents (extended version)

1. Complex processes of critical illness and/or organ failure related to changes in:
 - Airway and Respiratory;
 - Cardiovascular;
 - Neurological;
 - Musculoskeletal;
 - Gastrointestinal;
 - Genitourinary and nephrological;
 - Endocrine and metabolic;
 - Immunological and hematological.
2. The high-risk patient.
 - Applied anatomy and physiology
 - applied biophysics and biochemistry
 - applied microbiology and epidemiology
 - applied pharmacology and nutrition
3. Gerontogeriatric considerations
