

Course Unit	Health Data Treatment and Analysis		Field of study	-	
Bachelor in	Pharmacy		School	School of Health	
Academic Year	2023/2024	Year of study	3	Level	1-3
Type	Semestral	Semester	2	ECTS credits	5.0
Code	9549-803-3207-00-23				
Workload (hours)	135	Contact hours	T -	TP 30	PL 30
			TC -	S -	E -
			OT 7,5	O -	

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) António José Gonçalves Fernandes

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. delineate and to analyze data through the main methods and statistical techniques in the field of the natural and social sciences
2. collect data in an appropriate way
3. identify the appropriate statistical test, tends into attention the nature of data and the study's objectives
4. dominate the fundamental concepts of data analysis
5. interpret, correctly, the results
6. use statistical software to analyze data

Prerequisites

Before the course unit the learner is expected to be able to:
Don't have

Course contents

- I - Non Parametric Tests
 - I. 1. Introduction
 - I. 2. Localization tests for two or more samples
 - I. 3. Association tests
- II - Parametric Tests
 - II. 1. T-Student test
 - II. 2. One Factor Variance Analysis

Course contents (extended version)

1. Non Parametric Tests with statistical software
 - Introduction
 - Localization tests for two samples:
 - Sign
 - Wilcoxon
 - McNemar
 - Mann-Whitney-Wilcoxon
 - Localization tests for k samples:
 - Kruskal-Wallis
 - Friedman
 - Q-Cochran
 - Association tests:
 - Spearman Ordinal Correlation test
 - Pearson Chi-square test
2. Parametric Tests with statistical software
 - Introduction:
 - Kolmogorov-Sminnov test
 - Shapiro-Wilk test
 - Levene's test
 - Two samples:
 - T-Student test Two independent samples
 - T- Student Two related samples
 - k samples:
 - Fixed effects ANOVA
 - Random effects ANOVA - Random blocks ANOVA

Teaching and learning methods

Expository methodology; Interactive methodology Demonstrative methodology.

Assessment methods

- Alternative 1 - (Regular, Student Worker) (Final, Supplementary, Special)
- Final Written Exam - 100%

Language of instruction

Portuguese

Electronic validation
