

Course Unit	Geometry	Field of study	Training in Teaching Area
Bachelor in	Basic Education	School	School of Education
Academic Year	2023/2024	Year of study	2
Type	Semestral	Semester	2
Workload (hours)	162	Contact hours	T - TP 54 PL - TC - S - E - OT 18 O -
Level	1-2	ECTS credits	6.0
Code	9853-531-2203-00-23		

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Cristina MARcela Cordeiro Seabra, Manuel Celestino Vara Pires

#### Learning outcomes and competences

- At the end of the course unit the learner is expected to be able to:
1. Identify geometric concepts and procedures in diversified contexts.
  2. Apply geometric concepts and procedures in diversified contexts.
  3. Use different mathematical representations of a given geometric concept in an appropriate manner.
  4. Work independently, researching, collecting, interpreting and presenting information.
  5. Solve mathematical problems, communicating their own ideas and interpreting the other people's ideas.

#### Prerequisites

- Before the course unit the learner is expected to be able to:
1. Read and interpret mathematical information.
  2. Relate and use basic mathematical concepts.

#### Course contents

1. Historical development of geometry. 2. Geometric figures and solids. 3. Location and orientation in space. 4. Geometric transformations.

#### Course contents (extended version)

1. Historical development of geometry.
2. Geometric figures and solids.
  - Identification of geometric figures and solids.
  - Classification and characterization of geometric figures and solids.
3. Location and orientation in space.
4. Geometric transformations.
  - Concepts and properties.
  - Isometries.

#### Recommended reading

1. Breda, A., Serrazina, L., Menezes, L., Sousa, H., & Oliveira, P. (2011). Geometria e medida no ensino básico. DGIDC, Ministério da Educação.

5. Veloso, E. (2012). Simetria e transformações geométricas. Associação de Professores de Matemática.

#### Teaching and learning methods

1. Content exploration using, for example, explanation processes, texts discussions, writing reports or researching works. 2. Discussions of themes in small or large groups. 3. Individual or group work. 4. Resolution of tasks of different type and nature.

#### Assessment methods

1. Continuous assessment - (Regular, Student Worker) (Final)
  - Intermediate Written Test - 30% (Written summative test.)
  - Intermediate Written Test - 30% (Written summative test.)
  - Work Discussion - 40% (Implementation and discussion of the proposed tasks or the individual or group works.)
2. Assessment by examination - (Regular, Student Worker) (Supplementary, Special)
  - Final Written Exam - 100%

#### Language of instruction

Portuguese, with additional English support for foreign students.

#### Electronic validation
