

Course Unit	Ecotoxicology and Environmental Health			Field of study	Environmental Protection Technology		
HPTC in	Environmental Managment			School	School of Agriculture		
Academic Year	2020/2021	Year of study	2	Level	0-2	ECTS credits 6.0	
Туре	Semestral	Semester	1	Code	4068-576-2001-00-20		
Workload (hours)	162	Contact hours				E - OT 60 O -	

Name(s) of lecturer(s) Maria Eugénia Madureira Gouveia, Maria Sameiro Ferreira Patrício

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

- Know, understand and interpret the mechanisms of toxicity. Know toxicity assessment methodologies.
- 3. Identify, evaluate and monitor the potential occupational and environmental risk factors for human health.

 4. Calculate and interpret the most used indicators in epidemiology

 5. Understand the effects of environmental pollution on human health.

Prerequisites

Before the course unit the learner is expected to be able to:

Course contents

Mechanisms of toxicity; methods of assessing toxicity Ecotoxicology and environmental toxicology. Some technologies to reduce pollution in the environment. Environmental health: environmental agents and vectors that cause disease; Environmental epidemiology; Health and environment indicators; Occupational health; Environment and Public Health - Case studies.

Course contents (extended version)

- 1. Ecotoxicology
- Ecotoxicology
 Dose-response relationship in toxicology
 Mechanisms of toxicity
 Assessment methods of toxicity: acute toxicity, chronic toxicity, carcinogenesis, mutagenesis
 Methods of evaluation of toxicity in ecotoxicology.
 Evaluation of ecotoxicological parameters in aquatic, terrestrial and ecosystem environments
 Technologies to reduce pollution in the environment
 Environmental health
 Introduction, expensely and definitions.
- - Introduction, concepts and definitions
 Main environmental agents and vectors of diseases
 Basic concepts of Environmental Epidemiology
 Environmental health risk assessment

 - Health and environment indicators
 Occupational health
 - Environment and Public Health Case Studies

Teaching and learning methods

Classes' subjects are first presented to students, which are then assisted in developing class works and research activities.

Assessment methods

Alternative 1 - (Regular, Student Worker) (Final)
 Intermediate Written Test - 75%

11-11-2020

Language of instruction

Work Discussion - 25%
 Alternative 2 - (Regular, Student Worker) (Final, Supplementary, Special)
 Final Written Exam - 100%

Portuguese

Electronic validation Maria Eugénia Madureira Gouveia, Maria Sameiro Ferreira Patrício Maria Sameiro Ferreira Patrício Manuel Joaquim Sabença Feliciano
