

Course Unit	Anatomy	Field of study	Veterinary Science
Bachelor in	Veterinary Nursing	School	School of Agriculture
Academic Year	2022/2023	Year of study	1
Type	Semestral	Semester	1
Workload (hours)	189	Contact hours	T 30 TP - PL 45 TC - S - E - OT 20 O -
Level	1-1	ECTS credits	7.0
Code	9085-671-1101-00-22		

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Ana Raquel Dias Pereira, Paulo Jorge Pereira Afonso

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. At the end of the course unit the learner is expected to be able to: have knowledge about the morphology of the locomotor system.
2. To know the description of organs and systems of all different animals and compared anatomy of some lagomorphs, reptiles, birds and fish.
3. To have the knowledge about nervous system, circulatory, lymphatic, respiratory, digestive, reproductive, urinary, cardiac and skin of the domesticated animals.
4. To know the nomenclature of the systems of the species referred.

Prerequisites

Before the course unit the learner is expected to be able to:
Not applicable.

Course contents

Osteology, arthrology and miology: study of each structure individually, localisation on the body and significant peculiar items of each; Necropsy techniques; Splanchnology and some general concepts of morphology and physiology related; Topographic anatomy of some details with practical interest.

Course contents (extended version)

1. Practice: Anatomical nomenclature. Study of bones and skeleton. Osteology.
2. Theoretical: Osteology, arthrology and miology; skin and integument; Cardiovascular system;
3. Digestive system of monogastric and ruminants; Respiratory system; Urinary system;
4. Male and female reproductive system;
5. The Central and Peripheral Nervous Systems.
6. Exotic animals anatomy.

Teaching and learning methods

Lectures will be support by media and multimedia resources. Practical classes will engage direct working with animals, samples, models and dead bodies. Some of them will be dissection classes.

Assessment methods

1. T -50% (4 tests 9, 5) +P- 50% (3 tests 9, 5) - (Regular, Student Worker) (Final)
2. Complete assessment (practice 50%+theoretical 50%) - (Regular, Student Worker) (Supplementary)
3. Complete assessment (practice 50%+theoretical 50%) - (Student Worker) (Special)

Language of instruction

1. Portuguese
2. English
