6. Applies first aids techniques: Cardio Pulmonary Rehabilitation
7. Applies first aids techniques: specific techniques of immobilisation in traumatology
8. Applies first aids techniques: over bleeding, shock and burn skin situations

Prerequisites

Before the course unit the learner is expected to be able to:

1. Histology, anatomy, biomechanics
2. Sports coaching

Course contents

Hygiene; Traumatology; Sports injury; Injury mechanism; First aids; Prevention and rehabilitation of sport injury

Course contents (extended version)

1. Hygiene
 - Principals
 - Sport infectious pathology
 - Sports medical exam and legal implications
2. Traumatology
 - Definitions
 - Basic principals of prevention and treatment
3. Sports injury
 - Definitions
 - Characterization
 - Classification
 - Descriptive epidemiology
4. Injury mechanism
 - Physiological principals
 - Acute and chronic injuries
 - Psychological recovery
 - Flexibility
 - Right posture
 - Prevention and rehabilitation of sport injury strength program
5. Basic principals of First aids
 - Lateral position
 - Heimlich maneuver
 - CPR and sports application
 - Chasms
 - Asthmatic crisis
 - Fainting
 - Shock State
 - Burns
 - Bleeding
 - Myocardial infarction and cerebral vascular accident
6. Prevention and rehabilitation of sport injury
 - Fitness tests for sports practice after injury
