Name(s) of lecturer(s) António Miguel de Barros Monteiro

Learning outcomes and competences

- At the end of the course unit the learner is expected to be able to:

 1. know the evolution of adapted sport and the programs adopted throughout history

 2. Understand the importance of adapted sport in the process of inclusion in the educational, recreational, competitive and therapeutic processes

 3. Know the structures of organization of the adapted sport and different sport modalities

 4. Know and identify the different types of disability and the functional classification of people with special needs

 5. Recognize the contribution of physical exercise as a promoter of health and quality of life in people with special needs

 6. Understand the benefit / risk relationship associated with physical exercise in people with special needs

 7. Understand the importance of sport in the aging process

 8. Understand the benefit / risk relationship associated with physical exercise in the elderly

Prerequisites

Not applicable

Course contents

Adapted sport; Scope of the adopted sport; Adapted sport organizations; Type of disabilitys; Discontinuation of concepts of illness, handicap and disability; Functional classification of people with special needs; Auditory disability; Visual disability; Neuro-motor disability; Physical disability; Exercise in elderly; Benefits of physical exercise in aging.

Course contents (extended version)

- 1. Adapted sport
 - Historic evolution
- Adopted programs
 Scope of the adapted sport
 Educational

 - Recreational
 - Competitive
- Therapeutic
 Adapted sport organizations
 Paralympic Committee of Portugal
 International Paralympic Committee
 Sports classification

- Sports classification
 4. Type of impairments
 Congenital
 Acquired
 5. Deconstruction of concepts of illness, handicap and disability
 6. Functional classification of people with special needs
 Mental disability

 Discipled disability
- - Merital disability
 Physical disability
 Motor disability
 Sensory disability
 Multiple Disability

- Nutlitiple Disability
 Classification and etiology
 Strategies and handicaps for sports activities
 Sports modalities
- Visual ddisability
 Classification and etiology
 Strategies and handicaps for sports activities
 Sports modalities
- Neuromotor disability
 Classification and etiology
 Strategies and handicaps for sports activities
 Sports modalities
- 10. Physical disabilityClassification and etiology
- Strategies and handicaps for sports activities Sports modalities
- 11. Exercise in aging12. Benefits of exercise in aging

 - Deniells of exercise in aging
 Physical and physiological changes
 Psychological changes
 Physical fitness changes
 Exercise prescription

Recommended reading

Teaching and learning methods

Projection of slides exposure to theoretical and practical content of the program. Working individually and in groups on the content addressed in theoretical and practical lessons. Applicability of knowledge acquired, in activities or sports events held in the populations studied.

Assessment methods

- Continuous Evaluation (Regular, Student Worker) (Final)
 Intermediate Written Test 70% (Written test)
 Practical Work 30% (Practical work group)
 Exame Evaluation (Regular, Student Worker) (Supplementary, Special)
 Final Written Exam 100% (Written test)

Language of instruction

- Portuguese
 Portuguese, with additional English support for foreign students.
