

Course Unit	Steel and Composite Structures		Field of study	Solid Mechanics and Structures	
Master in	Construction Engineering		School	School of Technology and Management	
Academic Year	2022/2023	Year of study	1	Level	2-1
Type	Semestral	Semester	1	ECTS credits	6.0
Code	5024-419-1101-00-22				
Workload (hours)	162	Contact hours	T -	TP 60	PL -
			TC -	S -	E -
			OT -	O -	

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) **Pedro Nuno Gonçalves Nogueiro**

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:
Understand the global behaviour of the steel structures. Analysis and design of the steel structures.

Prerequisites

Before the course unit the learner is expected to be able to:
To find the internal stresses of the structures. Actions Quantification and their combinations.

Course contents

General concepts. Analysis of the steel structures. Design of the members of the steel structures. Steel connections. Design of composite beams.

Course contents (extended version)

- Chap. 1 General concepts
 - Contents and objectives, Regulation, Mechanical characterization of the materials.
- Chap. 2 Analysis of the steel structures
 - Global analysis of the steel structure. First order vs second order. Imperfections.
- Chap. 3 Design of members of the steel structures
 - Tension. Bending moment. Plasticity. Buckling. Lateral torsional buckling. Bending and axial force.
- Chap. 4 Connections
 - Welded connections. Bolted connections. Semi-rigid connections.
- Chap. 5 Composite beams
 - Interaction steel concrete. Headed studs connectors. Plastic analysis.

- Eurocode 3: Design of Steel Structures, Part 1-1: General Rules for Buildings, EN-1993-1-1, European Committee for Standardization, Brussels.
- Eurocode 3: Design of Steel Structures, Part 1-8: Design of Joints, EN-1993-1-8, European Committee for Standardization, Brussels.

Teaching and learning methods

The unit will be taught using a combination of theoretical and practical lectures, self guided learning. Practical exercises will be done in bases of the recommended literature. At the same time it will be followed the design of one steel structure.

Assessment methods

- Alternative 1 - (Regular, Student Worker) (Final, Supplementary)
 - Practical Work - 60%
 - Final Written Exam - 40%

Language of instruction

Portuguese
