T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Ana Sofia Cardim Barata, Nuno Filipe Lopes Moutinho, Sandra Herminia Cardoso Oliveira

### Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. Understand the essence of innovation and its role in the promotion of companies' competitiveness
2. Distinguish the stages in the innovation process and its special characteristics
3. Understand the principles of decision making in an innovation process
4. Link the research and practice of innovation management
5. Apply an inter-disciplinary, multi-functional problem-oriented approach
6. Understand how to integrate management of technological, organizational and market innovation
7. Understand processes in the national and international (particularly European) innovation systems

### Prerequisites

Before the course unit the learner is expected to be able to:  
Not applicable

### Course contents

Theoretical aspects of innovation. The role of innovation. National Innovation Systems (NIS). Innovation processes. Decision-making in an innovation process. European Union framework programs for innovation.

### Course contents (extended version)

1. Theoretical aspects of innovation
  - Why innovation matters
  - What is innovation
  - Types of innovation
  - Sources of innovation
  - Managing innovation
2. The role of innovation
  - Innovation and entrepreneurship
  - Building an innovative organization
  - Benefits of innovation
3. National Innovation Systems (NIS)
  - What is a NIS, its functions and elements
  - Examples of some NIS
4. Innovation processes
  - A contingency model of the innovation process
  - Evolving models of the innovation process
  - Learning to manage innovation
  - Measuring innovation success
5. Decision-making in an innovation process
  - Strategies for innovation
  - Technology and firm-specific competencies
  - Globalization of innovation
  - Decision-making and uncertainty
  - Risk management in innovation
  - Forecasting and risk assessment
6. European Union framework Programs for Innovation
  - Horizon 2020
  - Innovation Union
  - Program for the Competitiveness of Enterprises and SMEs (COSME)
  - European Bodies involved in research and innovation

### Teaching and learning methods

Theoretical exposition and discussion of concepts. Presentation, discussion and solution of case studies in order to promote the understanding of the concepts studied. Incentive to individual and group work in non-contact hours.

### Assessment methods

1. Alternative 1 - (Regular, Student Worker) (Final)
  - Intermediate Written Test - 40% (Mandatory, for regular students, in the normal period of exams. Optional for a student worker.)
  - Practical Work - 20% (Mandatory, for regular students, in the normal period of exams. Optional for a student worker.)
  - Projects - 40% (Mandatory, for regular students, in the normal period of exams. Optional for a student worker.)
2. Alternative 2 - (Regular) (Supplementary, Special)

**Assessment methods**

- Final Written Exam - 100%
- 3. Alternative 3 - (Student Worker) (Final, Supplementary, Special)
- Final Written Exam - 100%

**Language of instruction**

English

**Electronic validation**
