Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. Apply and consolidate theoretical knowledge acquired in the various scientific areas of the course, through its application in a real business context;
2. Demonstrate ability to solve international business management problems and make decisions in a real business environment;
3. Develop and consolidate skills and competences of self-learning and teamwork demonstrating adaptability and a sense of professional responsibility;
4. Demonstrate ability and competences of integration and relationship with professionals of different nationalities and branches of speciality;
5. Discuss critically and sustainably business management problems and present, in a written and oral form, duly substantiated feasible solution proposals;
6. Present, theoretically and empirically, in a consistent and scientifically-based practical solution to theoretical problems in the area of international business management;
7. Select relevant information and generate and manage scientific and business databases in order to prepare a course's final report in the area of international business management.

Prerequisites

Before the course unit the learner is expected to be able to:

1. Apply the knowledge acquired in the area of international business management;
2. Master English language for business.

Course contents

Integration of the student into the activity of the host company, with participation in different levels and functional areas, in an international business management context. Development of a final course report (thesis) according to the objectives and work plan defined for the internship in a real business environment.

Course contents (extended version)

1. Integration of the student into the business activity of the host company, namely through:
 - Definition of internationalization factors and penetration patterns in international markets
 - Definition of market entry and exit strategies (marketing and international strategy)
 - Definition of international business implementation policies and strategies
 - Market research
 - Corporate performance evaluation of international companies and definition of the financial strategy
 - Management control, introduction of innovation and of production and distribution strategies
 - Management of human resources and multinational work teams
 - Analysis of the economic, legal, social and political context of international markets
 - Generation, creation and implementation of ideas for international business development
2. Presentation, written and oral, of a course's final report of course containing:
 - Substantiated discussion of a theoretical problem in the area of international business management
 - Presentation of a possible empirical solution to the theoretical problem under discussion
