

Course Unit	System and Network Management	Field of study	Computer Engineering
Bachelor in	Informatics Engineering	School	School of Technology and Management
Academic Year	2023/2024	Year of study	3
Type	Semestral	Semester	1
Workload (hours)	162	Contact hours	T - , TP 60 , PL - , TC - , S - , E - , OT - , O -
Level	1-3	ECTS credits	6.0
Code	9119-706-3102-00-23		

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Rui Pedro Sanches de Castro Lopes, Hélder Miguel Gonçalves Pereira, Luis Filipe Rodrigues Corredeira Lobo, Sergio Paulo Perdigo do Vale

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. use a basic set of virtualization tools
2. install and configure both disconnected and networked computer systems
3. manage secondary storage medium, user accounts and system startup and shutdown procedures
4. install and configure basic network services
5. install and configure network file servers and authentication domains
6. identify and describe the role of integrated network management in modern organizations, and use some related tools

Prerequisites

Before the course unit the learner is expected to be able to:

1. identify TCP/IP computer networks concepts
2. use (including command line) Windows and Linux systems

Course contents

Virtualisation concepts. Disconnected Systems. Networked Systems. Integrated Network Management.

Course contents (extended version)

1. Virtualization Concepts
 - Systems Virtualization
 - Cloud Computing
2. Disconnected Systems
 - Disks, Partitions and File Systems
 - RAID and Volume Management
 - Local Backups
 - Local User Accounts
 - File System Security
 - Startup and Shutdown
3. Networked Systems
 - Basic Services (DNS, DHCP and e-Mail)
 - Network File Systems (NFS and SMB)
 - Network Authentication (NIS, SMB Workgroups, SMB Domains, LDAP)
 - Fault Tolerance
4. Integrated Network Management
 - Network Management Areas
 - Network Management Architectures
 - Network Management and Diagnostic Tools

5. Brian Svidergol, Vladimir Meloski, Byron Wright, Santos Martinez, Doug Bassett, "Mastering Windows Server 2016", Sybex, 2018.

Teaching and learning methods

The unit will be taught using a combination of theoretical and practical lectures (including installation and configuration of systems, services and applications, in virtualized test-beds). The unit documentation will be supplied through e-learning facilities. Learning experiences are developed individually and in group.

Assessment methods

- Alternative 1 - (Regular, Student Worker) (Final, Supplementary, Special)
- Experimental Work - 100% (Grading is performed according to a gamification structure, defined for the curricular unit.)

Language of instruction

1. English
2. Portuguese
