

Course Unit	Calculus I			Field of study	Mathematical and Quantitative Methods	
Bachelor in	Informatics and Communications			School	School of Public Management, Communication and Tourism	
Academic Year	2021/2022	Year of study	1	Level	1-1	ECTS credits 6.0
Туре	Semestral	Semester	2	Code	9188-320-1202-00-21	
Workload (hours)	162	Contact hours			C - S - solving, project or laboratory; TC	Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Ana Ester Veiga Rodrigues

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

- Read, write and use mathematical language fluidity.
 Solve easily problems envolving mathematical expressions.
 Recognize the meaning of formulas and be able to use them to solve problems.
 Use functions to modelling and solving problems.

Prerequisites

Before the course unit the learner is expected to be able to: use basic knowledge of mathematics.

Course contents

Study and representation of real functions. Function limits. Continuity. Derivatives. Applications of the derivative. Solve problem using derivative.

Course contents (extended version)

- Real functions of a real variable
- Formula and graph of a function
- Formula and graph of a function.
 Characteristics of functions: zeros, sinal and domain.
 Polinomial functions: affine, quadratic and polynomial with degree greater than 2.
 The algebra of fuctions. Division algorithm and Ruffini's rule.
 Monotonicity. Relative extrema for a function.
 Rational and irracional functions. Domain and range.
 Piecewise function. Absolute value function.
 Injectivity. Inverse function. Identity function. Composition of functions.
 2. Limit of a function
 Heine's limit definition. One sided limits. Limit properties.
 Indeterminate forms of limits.
- document is valid only if stamped in all pages

This

- Indeterminate forms of limits.
 Asymptote of functions.

- Asymptote of functions.
 3. Continuity of a function

 Continuity of a function at a point, on a set.
 Local properties of continuous functions.

 4. Exponential and Logarithmic Functions

 Exponential function: definition, graph and properties. Exponential equations and inequalities.
 Logarithm function: definition, graph and properties. Logarithmic equations and inequalities.

 5 Differentiation
- 5. Differentiation
 - Interpretations of the derivative. Differentiation formulas.
 - Derivative function. Derivative and continuity.
 Applications of the derivatives.
 - Sketch graphs.

Teaching and learning methods

The lessons are structuralized with the following components: - written exposition and verbal communication of the program contents; - illustrations with examples and counterexample; - resolutions of problems; - exercises resolutions, and subsequent presentation and discussion; - quiz to discuss concepts and assess knowledge acquired.

Assessment methods

- Distributed evaluation (Regular, Student Worker) (Final)
 Intermediate Written Test 50%
 Final Written Exam 50%
- Final evaluation (Regular, Student Worker) (Supplementary, Special)
 Final Written Exam 100% (All course contents)

Language of instruction

Portuguese
