

Course Unit	Communication Networks I	Field of study	Network and Computer Systems
Bachelor in	Informatics and Communications	School	School of Public Management, Communication and Tourism
Academic Year	2022/2023	Year of study	2
Type	Semestral	Semester	2
Level	1-2	ECTS credits	6.0
Code	9188-320-2204-00-22		
Workload (hours)	162	Contact hours	T - , TP 45, PL 15, TC - , S - , E - , OT 20, O -

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s)

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. understand and describe the devices and services used to support communications in data networks and the Internet;
2. understand and describe the role of protocol layers in data networks, namely the OSI reference model and the TCP/IP architecture;
3. design, calculate, and apply addressing in IP networks;
4. explain fundamental Ethernet concepts such as media, services and operations;
5. build wired and wireless LANs;
6. perform local network devices basic configurations;
7. know how to use common network utilities to verify network operations.

Prerequisites

Not applicable

Course contents

Basic Network Connectivity and Communications. Ethernet Concepts. Communicating Between Networks. IP Addressing. Network Application Communications. Building and Securing a SOHO Network.

Course contents (extended version)

1. Basic Network Connectivity and Communications
 - Networking Today
 - Basic Switch and End Device Configuration
 - Protocol Models
2. Ethernet Concepts
 - Physical Layer
 - Number Systems
 - Data Link Layer
 - Ethernet Switching
3. Communicating Between Networks
 - Network Layer
 - Address Resolution
 - Basic Router Configuration
4. IP Addressing
 - IPv4 Addressing
 - IPv6 Addressing
 - ICMP
5. Network Application Communications
 - Transport Layer
 - Application Layer
6. Building and Securing a SOHO Network
 - Network Security Fundamentals
 - Build a SOHO Network

Teaching and learning methods

Lectures, demonstrations, case analysis and discussion, interactive multimedia activities, laboratorial activities, practical assignments, self guided learning, Will be used computer network laboratories, simulators and e-learning.

Assessment methods

1. Continuous Evaluation - (Regular, Student Worker) (Final)
 - Intermediate Written Test - 40% (Two tests. Minimum global grade: 35%. Alternative: Tests (20%) + Networking Academy (20%))
 - Practical Work - 60% (Minimum global grade of 35%)
2. Distributed Evaluation - (Regular, Student Worker) (Supplementary, Special)
 - Final Written Exam - 40% (Minimum grade: 35%. Alternative: Exam (20%) + Networking Academy Exam (20%))
 - Final Written Exam - 60% (Practical exam. Minimum score: 35%)

Language of instruction

Portuguese, with additional English support for foreign students.
