

Course Unit	Gerontological and Geriatric Nursing			Field of study	-			
Bachelor in	Nursing			School	School of Health			
Academic Year	2023/2024	Year of study	1	Level	1-1	ECTS credits	3.0	
Туре	Semestral	Semester	2	Code	9500-811-1204-00-23			
Workload (hours)	81	Contact hours	T - TP 3	57,5 PL - T	rc - s -	E - OT	- 0 -	
T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other								
News (s) of last words Codes Dive March 7 or								

Name(s) of lecturer(s) Carlos Pires Magalhães

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

- At the end of the Course unit the learner is expected to be able to.

 1. Identify the phenomenon of population aging in a historical, cultural and social perspective;

 2. Describe the various biological and psychosocial theories try to explain the natural aging process;

 3. Describe the structural and functional biological, as well the psychosocial changes, which characterise the natural aging process;

 4. Make the distinction between natural aging normal processes and pathological deviances;

 5. To understand the specificity inherent of good geriatric and gerontologic practical cares.

 6. Identify politics/ support nets (health and/or social) to the elder.

Prerequisites

Not applicable

Course contents

1. Introduction: Basic terms definition and characterization of the senescence process. The phenomenon of population aging. 2. Biological and psychosocial theories of aging. 3. Bio-psycho-social changes associated with the aging process. . 4. Gerontologic stereotype and prejudice. 5. Specificity inherent of good geriatric and gerontologic practical cares. 6. Politics/ Support nets (health and/or social) to the elder.

Course contents (extended version)

- 1. Introduction:
 - Basic terms definition:
 - Senescence process;
- Seriesce increases,
 Primary, secondary and tertiary aging;
 General features of the aging process;
 The phenomenon of population aging.
 Biological Theories of Aging:
 Stochastic and determinist theories.

- 3. Psychosocial theories of aging.
- Activity Theory;
 Continuity Theory;
 Disengagement Theory.
 Structural and/or functional changes associated with the senescence process, in respect of:
 Cellular and tissue;

 - Locomotor system;Nervous and sensory system;
 - Integumentary system;
 - Cardiovascular and respiratory systems;

 - Digestive system;
 kidney and urinary system;
- kidney and urinary system;
 Endocrine system;
 Reproductive system;
 Immune system and biological rhythms.
 Psycho-social changes associated with the aging process.
 Gerontologic stereotype and prejudice.
 Specificity inherent of good geriatric and gerontologic practical cares.
 Politics/ Support nets (health and/or social) to the elder.

Teaching and learning methods

- Theoretical-practical classes (37, 5 hours): explanatory and reflective lessons using the available audio-visual aids

Assessment methods

- Evaluation (Regular, Student Worker) (Final)
 Development Topics 20% (Inverted Classroom)
 Final Written Exam 80% (Written exam)
 Final Written exam (Regular, Student Worker) (Supplementary, Special)
 Final Written Exam 100%

Language of instruction

Portuguese
