

Course Unit	Fundamental Nursing II	Field of study	Nursing
Bachelor in	Nursing	School	School of Health
Academic Year	2022/2023	Year of study	1
Type	Semestral	Semester	2
Workload (hours)	162	Contact hours	T - TP 37,5 PL 45 TC - S - E - OT - O -
Level	1-1	ECTS credits	6.0
Code	9501-699-1205-00-22		

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Andre Filipe Morais Pinto Novo, Leonel São Romão Preto, Maria Eugénia Rodrigues Mendes, Matilde Cristina Costa Poca

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. Integrate the principles governing the administration of medication, of collection of specimens for analysis and treatment of wounds
2. Promote to meet the needs of the patient on diet, mobilization, elimination bladder and bowel
3. Integrate the principles of various technical procedures in nursing and its practical development.

Prerequisites

Before the course unit the learner is expected to be able to:
Without Preconditions

Course contents

1 Preparation and Administration of therapy; 2 Collection of specimens for analysis; 3 Wounds and treatments; 4 Mobilization needs; 5 Satisfaction of the intestinal elimination; 6 Satisfaction of the need to urinary eliminate; 7 Satisfaction of the nutritional needs

Course contents (extended version)

1. Administration of therapy: Enteral, parenteral, topical, inhalation therapy and oxygen therapy.
2. Collection of specimens for analysis: blood, urine, feces, sputum, ooze, and other secretions.
3. Wounds: Classification of wounds and treatment; technique towels; Bandages.
4. Mobilization needs:
 - Principles used by the nurse; Complications of immobility and Prevention
 - Positioning the wearer stationary transfer the user from bed to chair and vice-versa
 - Mobilization; Prevention of pressure sores; Application of heat and cold
5. Satisfaction of the need to intestinal eliminate:
 - Review of the anatomy of the lower portion of the intestine and physiology of defecation;
 - Promotion of normal habits, help to eliminate normal; Nursing interventions;
 - Technical support for the intestinal elimination - Enteroclysis.
6. Satisfaction of the need to urinary eliminate:
 - Review of the anatomy and physiology of the renal unit of urination;
 - Basic concepts; Urine characteristics; Data indicators of changes;
 - Factors that influence the urinary habits / patterns;
 - Promotion of normal habits / Assistance to the normal elimination;
 - Elimination during bladder disease / Technical support bladder elimination;
 - Bladder catheterization: indications, method/considerations; Technique of urinary catheterization.
7. Satisfaction of nutritional needs of client / nursing role:
 - Initial assessment; factors that influence the dietary patterns;
 - Health promotion and disease prevention / nutrition guidelines;
 - Nursing care with natural diet: to maintain / increase the appetite,
 - Encouraging intake of appropriate diet, improve digestion and absorption of food;
 - Enteral nutrition: feeding by nasogastric tube; Technique of Nasogastric Intubation.
