

Course Unit	Medical-Surgical Nursing I	Field of study	Nursing
Bachelor in	Nursing	School	School of Health
Academic Year	2022/2023	Year of study	2
Type	Semestral	Semester	1
Level	1-2	ECTS credits	6.0
Code	9501-699-2103-00-22		
Workload (hours)	162	Contact hours	T - , TP 75, PL - , TC - , S - , E - , OT - , O -

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Maria Gorete de Jesus Baptista Martins, Claudia Sofia Goncalves Nunes, Luis Carlos Almeida Pires

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. Identify, understand and explain the focus of attention associated with each pathophysiological change due to different disabilities and clinical conditions of the patient;
2. To understand, discuss and intervene in the therapeutic acts instituted to control and prevent pathophysiological changes related to the various clinical conditions;
3. Identify and discuss the needs of nursing intervention, in a holistic conception, related to the various disabilities;
4. Define and implement an individual plan of assistance to the patient, transversal to the various focuses of attention resulting from the incapacities resulting from the clinical conditions.
5. Identify the physical, psychological, social and spiritual needs of the patient/family, in order to develop and implement an individualized plan of care before, during and after surgery.

Prerequisites

Before the course unit the learner is expected to be able to:
Not applicable

Course contents

Identification, rationale and prescription of nursing interventions adequate to control the outbreaks of attention resulting from the incapacities of the patient related to: 1 - perioperative period condition; 2 - pathophysiological changes of the cardiovascular system and hemodynamics; 3 - pathophysiological changes of the respiratory system; 4 - pathophysiological changes of the nephro urological system; 5 - pathophysiological changes of the integumentary system.

Course contents (extended version)

1. Interventions to the patient in the perioperative period;
 - General concepts and considerations about the Surgical patient, surgeries and surgical environment
 - Nursing care in the preoperative period
 - Nursing care in the intraoperative period
 - Nursing care in the postoperative period
2. Interventions inherent to pathophysiological changes of the cardiovascular and hemodynamics systems;
3. Interventions to the patient inherent to pathophysiological changes of the respiratory system;
4. Interventions to the patient inherent to pathophysiological changes of the nephro urological system;
5. Interventions to the patient inherent to pathophysiological changes of the integumentary system.

Teaching and learning methods

Classes are theoretical practical type exhibition and interactive methods through strategies of analysis, debate and discussion of case studies and simulations, using communication techniques oral and multimedia projection of fundamental topics, promoting the individual reflection and encourage communication. Seminars and video viewing

Assessment methods

1. Written exam - (Regular, Student Worker) (Final)
 - Final Written Exam - 100%
2. Written exam - (Regular, Student Worker) (Supplementary, Special)
 - Final Written Exam - 100%

Language of instruction

Portuguese, with additional English support for foreign students.
