

Course Unit	Methods and Techniques of Research		Field of study	Pharmacy	
Bachelor in	Pharmacy		School	School of Health	
Academic Year	2022/2023	Year of study	3	Level	1-3
Type	Semestral	Semester	2	ECTS credits	5.0
Code	9549-644-3106-00-22				
Workload (hours)	135	Contact hours	T -	TP 45	PL -
			TC -	S 7,5	E -
			OT 15	O -	

T - Lectures; TP - Lectures and problem-solving; PL - Problem-solving, project or laboratory; TC - Fieldwork; S - Seminar; E - Placement; OT - Tutorial; O - Other

Name(s) of lecturer(s) Olívia Rodrigues Pereira, Fábio Teixeira Kuhn, Tania Cristina Sao Pedro Pires

Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

1. GENERALS: Recognize the research process in health: the epistemologies, methodological, technical and ethical aspects, in articulation theoretical/empirical field, in the practical clinical one
2. Elaborate a Project of Research in the field of pharmacy and / or medicine
3. Develop a review of the literature in the field of pharmacy and / or medicine
4. SPECIFICS: Recognize the need of analyze a critical appreciation of research in the field of pharmacy and / or medicine
5. Knowing develop a critical appreciation of the types of research instruments and their suitability for particular research questions in the field of pharmacy and / or medicine
6. Know the inherent elements to the instrumental and methodological plan of a research
7. Be able to perform all steps of the Research Planning, Execution and Publication
8. Be able to present in oral and written form the developed work

Prerequisites

Before the course unit the learner is expected to be able to:
Not applicable

Course contents

History of the development of the human sciences. Common sense to scientific research. Scientific method and scientific research. Types of Research. The investigation process. Construction of a Research Project. Phases and Stages of the Research Process. Disclosure and reporting the results of an investigation. Academic and Scientific Papers.

Course contents (extended version)

1. History of the development of the human sciences. Common sense to scientific research.
2. Scientific method and scientific research.
3. Types of Research.
4. The investigation process.
5. Construction of a Research Project. Phases and Stages of the Research Process:
 - Conceptual phase: Theme; Problem or question of departure; Literature review; Hypotheses
 - Methodological phase: Design, Sample, Variables; IDC; Collection of data; Results.
6. Disclosure and reporting the results of an investigation. Academic and Scientific Papers:
 - Search work
 - Research Report
 - Scientific Article
 - Scientific Poster
 - Oral Communication

Teaching and learning methods

Theoretical-practical Lessons: exhibition and interactive methodology; practical application of the methods and techniques of research in the field of Pharmacy; OT Lessons: guidance and monitoring stages of the research works; Seminar Lessons: presentation of research works.

Assessment methods

- Review Paper + Research Project - (Regular, Student Worker) (Final, Supplementary, Special)
- Development Topics - 50% (Literature Review paper (PT, EN). 25% Oral, 25% Writing; Applies minimum score of 8. 5 points)
- Projects - 50% (Research Project - 25% Oral, 25% Writing. Minimum score of 8. 5 - Pedagogical Regulation)

Language of instruction

1. Portuguese
2. Portuguese, with additional English support for foreign students.
