### Learning outcomes and competences

At the end of the course unit the learner is expected to be able to:

Know the pathophysiology, prevalent diseases and laboratory tests for the diagnosis of the pathology of the respiratory, digestive, endocrine, urinary, genital, osteoarticular and nervous systems.

### Prerequisites

Before the course unit the learner is expected to be able to:

1. To know the anatomy and physiology of the organic systems to be studied
2. Relate the anatomy and physiology of the organic systems to be studied

### Course contents

Pathology of the respiratory system Diseases of the digestive tract Pathology of the endocrine system Changes in renal function Pathology of the female and male genital system Musculoskeletal pathology Nervous system pathology

### Course contents (extended version)

1. Pathology of the respiratory system . Asthma . Pulmonary disease . Pulmonary infections
2. Diseases of digestive system . esophagus . stomach . intestine . biliary tract . liver . pancreas
3. Pathology of the endocrine system: . hypophysis . thyroid . adrenal . gonads . endocrine pancreas
4. Alterações da função renal . Rim . Aparelho excretor
5. Pathology of the genital system . testicle, penis and prostate . vulva, uterus, ovaries and breast

### Teaching and learning methods

The teaching method is essentially expositive with lecturing of the physiopathological mechanisms of diseases and pathologies affecting the human organ systems, with a special focus on complementary diagnostic exams

### Assessment methods

- Final - (Regular, Student Worker) (Final, Supplementary, Special)
- Final Written Exam - 100%

### Language of instruction

Portuguese

### Electronic validation
